

FABRICATED PIPEWORK

Deepdale manufacture large diameter pipework in most grades of material including exotic and specialist materials for Offshore & Process sectors.

Sizes range up to 40 tonnes in weight, 50mm thick or 4600mm diameter.

All weld processes are available, welders are coded to EN287/288 & ASME standards.

N.D.T. facilities are available and in addition ancillary services such as Machining, Shot-blasting & painting are available locally.

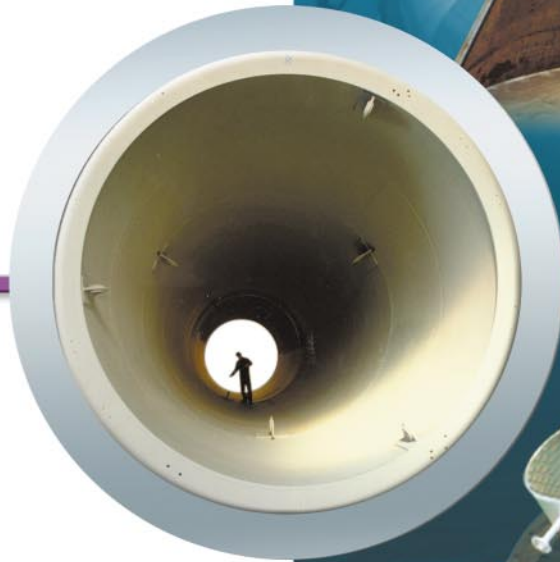

TYPICAL PRODUCTS:

- Concentric Reducers
- Eccentric Reducers
- Square to Round Transition Pieces
- Equal Tees & Reducing Tees
- Lobster Back Bends
- Manifolds
- Venturii's

Whatever your individual needs, we are sure that, by speaking to Deepdale's team of experienced engineers, a solution to your problem is just a phone call away.
