

FABRICATIONS

Deepdale Engineering offer a competitive and reliable service to industry on a complete supply or 'free issue' basis for fabrications in Mild and Stainless Steel up to 40 tonnes.

Our in-house plant is exceptional, we can roll materials up to 50mm thick, and up to 4600mm in diameter and weld by automatic sub arc, flux cored, M.I.G. and T.I.G. processes.

All our welders are qualified to the requirements of EN 287/288 and ASME.

Radiographic, Ultrasonic, M.P.I., stress relief and painting facilities are all available. We also carry a large stock of materials at all times, ensuring competitive deliveries.

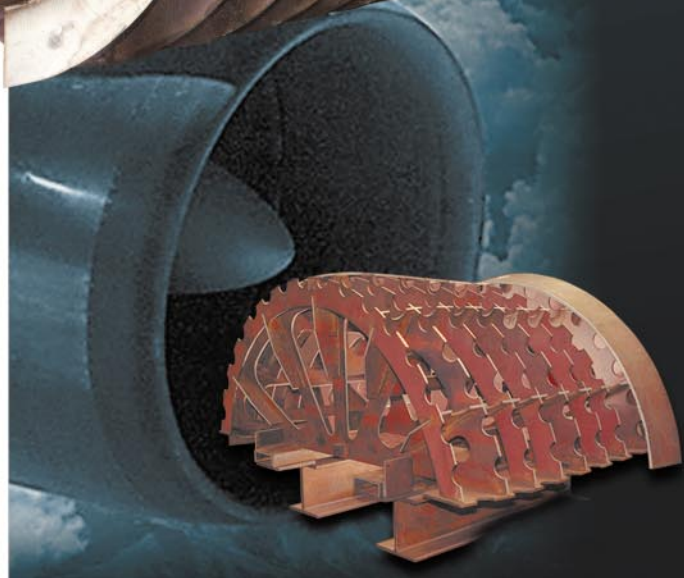

TYPICAL PROJECTS:

- Large offshore fabrications
- Aerospace
- Petro chemical installations
- Fabrications for wind and wave energy applications
- Military vehicle components
- One off projects
- Batch projects

Whatever your individual needs, we are sure that, by speaking to Deepdale's team of experienced engineers, a solution to your problem is just a phone call away.
